Instructions

This activity should take students approximately 15-20 minutes to complete.

After watching the video, teachers can use these questions to facilitate class discussion or provide students time to research and answer.

Reflect, research and answer

1. What is biodiversity?
2. What does it mean that “every living thing has a job in the environment”?
3. Why is it important to protect biodiversity?
4. How would you protect biodiversity?
5. Draw a picture demonstrating the connection between the sea turtle, corals, algae and sand
